SUMMARY

I am a dynamic and result-driven Software Engineer with a relentless drive to tackle challenges and excel in every endeavor. I am committed to staying abreast of cutting-edge technologies and embracing innovation in software development. Known for my strong work ethic, punctuality, and an innate ability to solve complex problems efficiently, I am eager to contribute my expertise and passion to drive projects forward and achieve outstanding results

EXPERIENCE

Full Stack Engineer

Trumemo

📅 01/2022   📍 Remote

Trumemo Software is a web-based tool designed to help agencies and providers who support individuals with developmental disabilities

- Played a key role in architecting and developing modern web applications using React, Node.js, and MongoDB, delivering scalable and maintainable solutions
- Led the front-end and API integration efforts in multiple healthcare-focused systems for the U.S. market, ensuring compliance with regulatory standards such as HIPAA
- Designed and implemented complex Redux-based state management strategies, significantly improving application performance and maintainability
- Proficient in generating PDFs and other documentation formats to facilitate efficient information sharing and record-keeping
- Committed to maintaining transparency and accountability through consistent daily reporting
- Collaborated within Agile development teams, leveraging Scrum framework to deliver high-quality software in iterative sprints
- Participated in sprint planning, daily stand-ups, sprint reviews, and retrospectives to ensure continuous improvement and alignment with project goals
- Key contributor to Trumemo, a robust healthcare management system designed specifically for the US market
- Designed and implemented modules for comprehensive patient data management, tracking patient progress over time, logging incident reports, monitoring behavior, and developing customizable care plan templates

Front End Developer (Lead)

MetaKlouds

📅 01/2024 - 04/2024   📍 Remote

Intralign is a business development roadmap tool aimed at streamlining strategic planning and operational alignment for businesses

- Worked closely with UX/UI designers and product managers to ensure the platform's layout was aesthetically pleasing and functionally robust
- Contributed to the development of an Interactive Timeline feature, enabling users to visualize and track strategic initiatives
- Regular stand-ups, code reviews, and sprint planning sessions ensured team alignment and adaptability
- Translated client and user needs into actionable tasks, ensuring robust and highly efficient web application development
- Fostered a collaborative work environment through meticulous code reviews and proactive client-developer communication

EXPERIENCE

Front End Developer (Lead)

MetaKlouds

📅 04/2025 - 04/2025   📍 Remote

Electra is an AI-powered multi-agent business assistant platform
- Contributed to the development of Electra, a next-generation AI platform enabling users to interact with specialized AI agents
- Developed complex frontend features including dynamic multi-step forms, advanced multi-field filtering, and interactive data tables
- Designed and implemented a responsive and visually engaging UI using React, Tailwind CSS, and Material-UI
- Integrated Google Sign-In/Sign-Out to provide secure authentication experiences
- Implemented WebSocket-based real-time communication for live chat and agent interactions
- Collaborated with cross-functional teams in an Agile environment for rapid iteration based on user feedback

Front End Developer

MetaKlouds

📅 05/2025 - 07/2025   📍 Remote

Voyage Vite is a web admin panel for property and vehicle rental operations
- Developed the web application for Voyage Vite, an advanced admin panel for managing property and vehicle rentals
- Built with React and Vite to ensure fast performance and efficient development workflows
- Integrated the Google Maps API for interactive map-based search and geo-tagging
- Implemented robust search and multi-criteria filtering features for enhanced discovery of listings
- Built a scalable User Management system with secure authentication
- Developed a dynamic Content Management System (CMS) for real-time listing updates and promotional content management
- Ensured real-time data synchronization between the web admin panel and the production mobile app

EDUCATION

Bachelor of Science (B.S.)

CECOS University

📅 09/2018 - 09/2022   📍 Peshawar, Pakistan
